MODEL 3175-01 and 15401-02, 48 INCH WIRE COLLECTORS

The 48" Wire Collector is a pedestal-mounted, V-shaped trough for collecting short wires produced by an automatic stripper. A rubber wire stop in the trough can be adjusted quickly to handle different wire size lengths. The sides of the troughs slope at a 45° angle for easy wire removal. The height is adjustable as also the trough pivot degree.

MODEL 3175-01

Is designed to work with all Pneumatic Automatic Wire Strippers. It requires interface Kit No. 15490-03

MODEL 15401-02

Is designed to work with all AutoStrip electric programmable strippers. It requires interface Kits No. 13747-02 for Models 7400, 7600, 8000, and 8900. For model 4900 use Kit No. 15316-02.

SPECIFICATIONS		REQUIRED INTERFACE KITS
LENGTH OF TROUGH	48 in (1219mm)	<ul style="list-style-type: none"> • Kit No. 15490-03 for 3175-01 To be Interfaced with Models 2700-05, 2745-05, 2745-06, 2940-05 and 4040-05 • Kit No. 13747-02 for 15401-02 To be Interfaced with models 7600, and 8900 Kit No. 15316-02 for Model 4900
BASE DIAMETER	14 in (356mm)	
HEIGHT	Adjustable from 29.5 to 39.5 in (750mm to 1,000mm)	
WEIGHT	28 lbs (13kg)	
SHIPPING WEIGHT	36 lbs (16kg)
